 APERTURA VIAGGIO

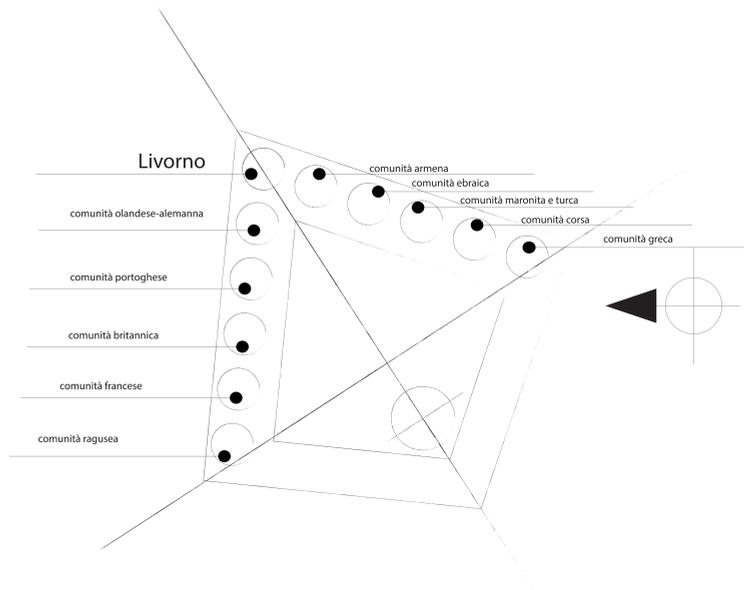

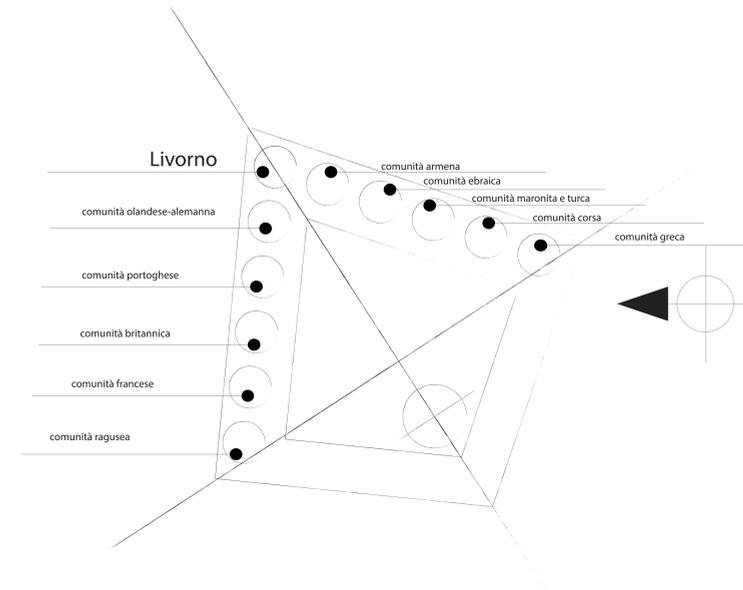

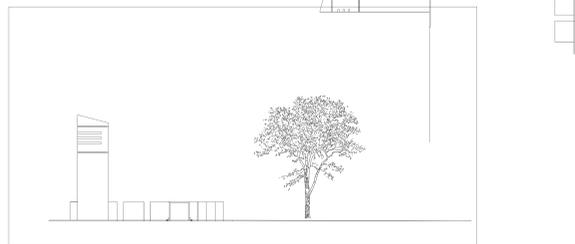

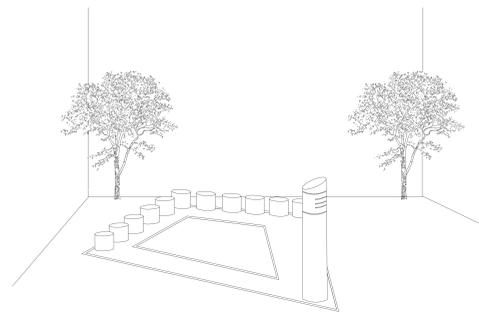

Colonna cilindrica in Corten con dei tagli esterni. All'interno è posta una campana che in vento fa suonare

una forma semplice che si ispira alla ciminiera delle grandi navi mercantili che nascevano nell'area antistante.  
 il cilindro è una struttura sonora orientata come il vento di libeccio quando soffia il vento emette un suono

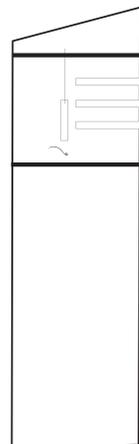

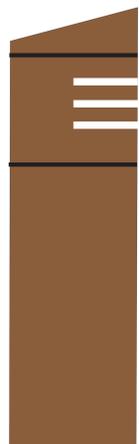

Sedute in Corten e base in cemento

corten

colonna in cemento

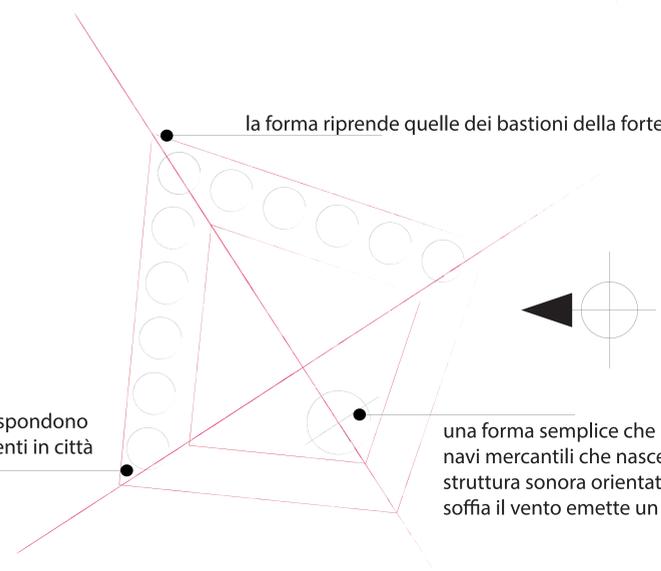

cordolo in cemento

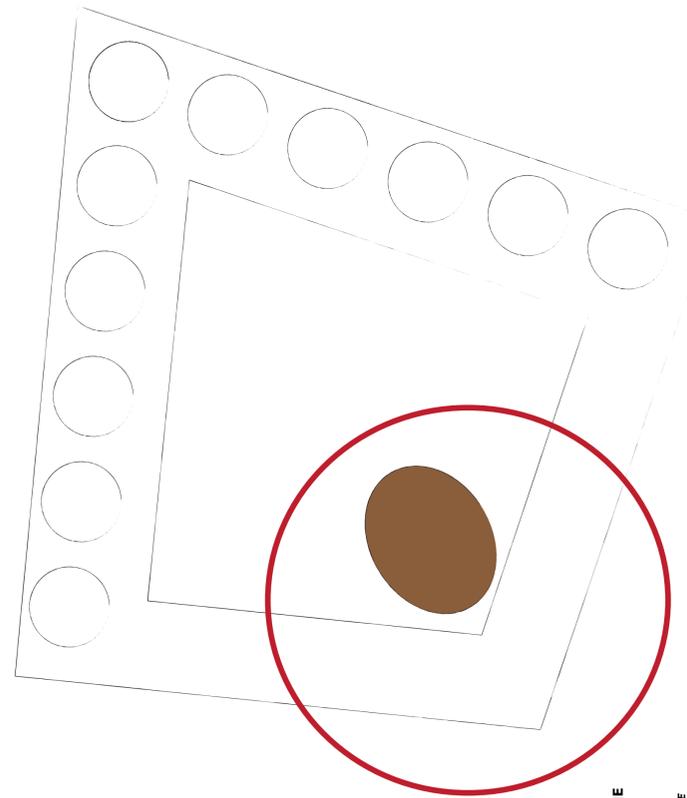

la forma riprende quelle dei bastioni della fortezza

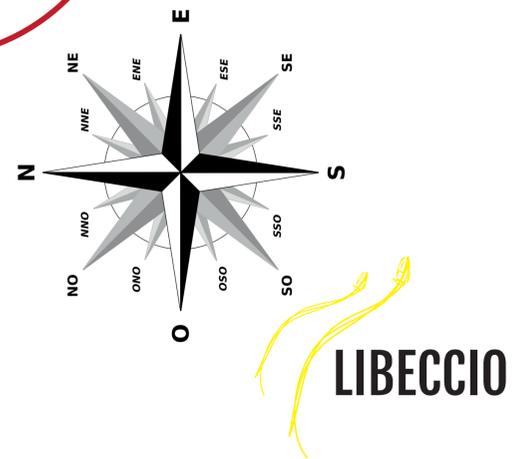

10 sedute + 1 sono gli sgabelli che corrispondono al numero delle comunità storiche presenti in città più Livorno

una forma semplice che si ispira alla ciminiera delle grandi navi mercantili che nascevano nell'area antistante. struttura sonora orientata come il vento di libeccio quando soffia il vento emette un suono
